About Auto Physical Stock Verification Report

Introduction

Tally has enabled to provide solutions to simplify the business needs to the level as simple as possible. One such module is Auto Physical Stock Verification Report.

This module is used to verify the physical stock maintained in comparison to the stock in Tally. Here the data is sorted in a manner such that the report displays the difference between the stocks maintained.

Installation

This module is installed / configured automatically when downloaded from the Tally Shop.

Sall .: 9

System requirements:

No additional hardware / software infrastructure is required for executing and operating this module.

82192

Detailed Setup Guide:

To operate this capability, user will have to follow the following steps:

a) The Gateway of Tally screen appears as below when the file is active.

b) The screen shows the stock as per tally.
